FOREWORD

Almost sixty-five years after the publication of the last volume of 'Harper Letters' the Department is pleased to have been enabled, thanks to the unselfish efforts of two young Assyriologists, S. Parpola and M. Dietrich, to add substantially to a collection of documents the importance of which hardly needs stressing.

The new material has been divided into its two dialectal components. Professor Parpola, now of the Oriental Institute in Chicago, gives us in this volume the Neo-Assyrian letters. The Neo-Babylonian ones, by Professor Dietrich, will be found in the companion volume, CT 54.

PREFACE

The present volume contains copies of 981 Neo-Assyrian tablets and fragments representing 1069 originally separate items in the Kuyunjik and related collections of the British Museum. Of these, 958 are published for the first time, while 65 have previously been made available in transliteration and 46 in copy (see the concordance below). The latter have been recopied mainly because of joins to the unpublished texts of this volume.

An overwhelming majority (964) of the texts are letters from the royal archives of the Late Assyrian Empire (mainly from Nineveh, perhaps partly also from Calah, e.g. No. 829). One text (No. 974) is a private letter from Ashur; the remaining 16 (see the list below) are probably not letters, though an absolutely certain classification is not possible in each case owing to the fragmentary nature of the material.

The volume is intended to include all previously unpublished Neo-Assyrian letters in the British Museum identified to date, with the following exceptions: two letters (BM 79099 and 132980) to be published elsewhere by A.R. Millard; eight letters (K 5490, K 7980(+)14676, K 14594, K 15004, 83-1-18,147, 83-1-18,153, 83-1-18,742 + Bu 91-5-9, 149 and Ki 1904-10-9,214) not copied for various reasons, a fragment (81-2-4,420) joined to ABL 1132 and transliterated in AOAT 5/1 (No. 65); and 96 fragments (see the list below) the pertinence of which to the genre seemed possible but could not be confirmed. A full 250 texts listed in the catalogues of Bezold and King as possibly belonging to the genre turned out to be wrongly classified and were therefore excluded from the present volume. A detailed catalogue of these texts, which include fragments of diverse literary compositions, royal inscriptions, legal and administrative records, treaties, cultic rituals, prophecies, haruspical queries, and Neo-Babylonian letters and reports, will be published in a separate article by S. Parpola.

With the above reservations, the present volume can be said to complete the publication of the extant remains of the important Ninevite letter archive, of which only about a half (published at the turn of the century in R. F. Harper's *Assyrian and Babylonian Letters*) was hitherto accessible for study. Three other Neo-Assyrian letters in the Museum's collections were published by R. Campbell Thompson in *Iraq* 4(1937), 186-9 (BM 123358) and 7(1940), 99 (BM 123359) and by S. Parpola in *Iraq* 34(1972), 21-34 (BM 135586). Compared with the Harper letters, the texts presented here are generally in poorer condition, more effaced and harder to read, and above all offer the prospect of more joins. In addition to the joins discovered before and during the process of copying the texts, a number of joins were found after the completion of the plates (see the list below), and judging by the multitude of fragments with sharp breaks it seems certain that many more joins (perhaps twice the number already discovered) are to be expected once the

material has been subjected to careful detail analysis. A glance at the plates will suffice to show how essential the task of joining will be for the utilization of the texts: while containing potentially unique historical information, a large part of them are, in their present condition, practically worthless and can gain significance only through association with other fragments in the collection.

It was originally planned that the volume would contain, as usual, a summary descriptive catalogue setting out, as far as possible, the authorship, address, date and content of each individual document. The fragmentary nature of the material, however, made a practical realization of the plan impossible. Instead, the volume contains, besides a list of senders and addressees, a compact subject index (taking into account in some measure the chronological structure of the collection) which it is hoped will facilitate study of the texts until the complete word index, now under preparation, is available.

For better legibility the copies are slightly enlarged, and the vertical spacing of the lines has been standardized; but it was considered extremely important, not least because of the prospect of making joins, that the copies render as accurately as possible such features as tablet shape, nature of breaks and other damage, spacing, disposition and form of signs, and other peculiarities of scribal hands (e.g. relative size of signs). Original outlines of broken tablets which may be estimated from the curvature of the tablets and which bear on the restoration of broken passages are indicated in the copies by broken lines (---); small arrows at the left indicate the direction of writing on the left edge, relevant for the determination of Obverse and Reverse in cases of doubt.

The copies and indices are the work of S. Parpola, except for 40 tablets copied by K. Deller (Nos. 12, 16, 22, 25, 30, 32, 33, 36, 43, 44, 47, 49, 54, 57, 63, 64, 66, 70, 71, 78, 80, 82, 92, 98, 108, 113, 122-125, 127, 128, 133, 134, 142, 144-146, 151, 154). Nos. 98 and 144 were also copied by Parpola (Pls. 92 and 200). No. 84 is available in two copies (Pls. 31 and 74, both by Parpola). Plates 1-52 date from 1964-1969, the remainder from May - June 1974.
